OBJECTIVE

Senior Frontend Developer | Full Stack Engineer | Technical Lead

- **Frontend Engineer** with **7+ years of experience**.
- Deep expertise in **React**, **TypeScript**, and **Vue**, with a focus on scalable architecture, performance optimization, and developer tooling.
- Mentored **5 developers**, leading to successful probationary periods and exceeding performance expectations.
- Developed and integrated **automated tests** into the project, resulting in a **20% reduction** in the number of bugs.
- Open to: Frontend/Full Stack Development, Technical/Team Lead roles.
- Experienced in remote and hybrid work environments with async communications, but open to remote/hybrid and on-site positions.

EXPERIENCE

Senior Frontend Developer

February 2024–**Present**

[Trade Republic](#) | The largest savings platform in Europe | 8M+ users | Berlin, Germany

- Implemented Protobuf binary messaging for **WebSocket communications**, reducing average message size by **60%** and improving real-time market data latency
- Developed an embedded **UI widget system** distributed as npm packages, enabling cross-team component reuse and, as a result, accelerating feature delivery.
- Established an automated **security pipeline** using Renovate bot to scan repositories for vulnerabilities and license issues, automatically creating PRs for security updates, resulting in a reduction in manual review time

Senior Frontend Developer & Frontend Team Leader

March. 2022–January 2024

[EXANTE](#) | Global investment platform | 10K+ high-net-worth users | Cyprus, UK (Remote)

- Led the integration of testing into projects, which improved application reliability; Introduced automated test runs into the CI process to validate the UI component library across all projects; reduced the number of bugs by **20%**.
- Designed and developed a response caching mechanism that reduced API calls by **30%**.
- Led the design and facilitation of an online workshop, engaging **15 developers** in exploring advanced state management practices.

Frontend Developer

April 2021–March 2022

[Kaspersky Lab, Inc](#) | Cybersecurity software | 400M+ users | Moscow, Russia

- Conducted a thorough audit of code quality and identified areas where linting would be effective; decreased the number of code errors by **30%**, which led to faster development cycles.
- Replaced the large, officially deprecated date library with a smaller modern alternative, reducing the size of the application package by **10%**.

Full-stack Developer

December 2019–April 2021

QIWI Contact | Payment and financial services | 16M+ users | Moscow, Russia

Frontend Developer & Frontend Team Leader

June 2018–December 2019

Bars Group | Software company | Enterprise clients | Russia

EDUCATION

Engineer's Degree (Equivalent to a Master's degree) in Automotive Engineering

2009–2015

Kazan National Research Technical University

SKILLS

Core: JavaScript, TypeScript, CSS, Git, NodeJS, SQL, NoSQL, Serverless

Frontend: React, Redux, Vue, Nuxt, Pinia, Tailwind, Styled Components, Storybook

Backend: REST, WebSockets, GraphQL, Express, Firebase, PostgreSQL, MongoDB, Protobuf

DevOps: GitHub Actions, GitLab CI, Docker
